Walking dead season 10 cast alpha

The Walking Dead will finish its run on TV in 2022. On Wednesday, AMC announced that season 11 of the zombie drama would be its last. AMC will deliver an extended 24-episode season that is expected to run from 2021 to late 2022. This is the first time since the show premiered in 2010 that it will not debut a new season in October. In July, showrunner Angela Kang confirmed that Season 11 will not premiere this fall due to the ongoing coronavirus pandemic. The series, which began as a one-man survival journey with his family and grew to be a show about group survival during the apocalypse, ushered in an era of zombie-related series ranging from Z Nation and iZombie to The Santa Clarita Diet. Even though TWD began lowering its ratings after a fan backlash to season seven premieres, recent showrunner Angela Kang did the impossible by transforming the show's quality even as the main star, Andrew Lincoln, left the show. Seasons nine and 10 are perhaps some of his best. ... The Walking Dead isn't completely leaving. AMC has announced fan-favorite characters Daryl (Norman Reedus) and Carol (Melissa McBride) will lead the new spinoff series, which is currently scheduled to premiere in 2023. The network is also developing an anthology series that will follow a number of past, present and new actors. The Walking Dead cast and crew have shared their reactions as the flagship show comes to an end and the TWD universe heads into new territory. Norman Reedus says the show changed his life Norman Reedus was cast as an original character who didn't exist in the comics. Eliza Morse / AUA I feel incredibly honored to be a part of The Walking Dead. This show has changed my life and career, and everyone involved has really been a family to me over the past decade.' Reedus said in a statement provided to Insider. Reedus joined the series as Daryl Dixon, a character who doesn't exist in Robert Kirkman's comic book of the same name. In a 2014 interview with GQ, Reedus said he read lines for the show after it had already been completely cast. He was just hoping for a path to the show. A decade later, Dixon's journey from red singleton to compassion and loyal leader helped him become a fan favorite, and now, the star of the show. Fans rallied so much behind the character that Daryl's mantra of die, we riot, became a passionate phrase. I am grateful for AUA's love and support and know that there is much more history to tell and more to bring to the best fans in the world,' he continued. Daryl's relationship with Carol has always been my favorite relationship on the show (sorry Rick). I love how these characters interact and relate to each other on many levels and can't wait to see where their trip goes from here. ... Showrunner Angela Kang says she bitterly says goodbye to the show that has been a part of her life for a decade, but she's ready for the next chapter I'm Looking Forward to Digging With Our Brilliant Writers, Producers, Directors, Actors and Crew to Bring This Epic Finale Robert Kirkman's stories to life for our fans over the next two years, Kang said in a statement. Angela Kang is spotted at New York Comic Con in 2019. Elijah S. Savenik/Getty Images for ReedPOP Kang was the writer and history editor on the show from season two before getting promoted to showrunner on the ninth season of the series. There are not many female showrunners and Kahn was handed the keys to one of the biggest shows on TV at the pivot point when two stars, Chandler Riggs and Andrew Lincoln, were outside the door. Initially, fans and critics (included themselves) were skeptical about whether the show could go on without Rick Grimes. Not only could he move forward, but Kang revealed that the series still has its feet, refocusing the show on its ensemble, keeping fans on their feet with unexpected twists and turns. In her first episode as a showrunner, she quickly killed a character who overstepped his welcome and pulled the trigger on a massive multi-figure death from a comic book episode before many thought it would happen. When an insider asked Kang why the moment didn't come during the season nine finale, Kang said it was the original plan, but she didn't want to drag the show out of what sounded like a filler episode. She wanted the story to move on. The flagship series Of The Walking Dead has been my creative home for a decade and so bitterly bring it to an end, but I couldn't be more excited working with Scott Gimple and AMC to develop a new series for Daryl and Carol,' Kang said of what's next. Working with Norman Reedus and Melissa McBride has been the highlight of my career and I'm thrilled that we get to keep telling stories together. Melissa McBride is ready for the carol show and Daryl Daryl was a friend of Carol's, a trustee, and ride or die on TWD. Jackson Lee Davis/AUA McBride plays beloved fan Carol Peletier, who has long endured the comic death of her character. When asked by The Insider about the decision to keep Carol's character in the series, TWD Universe chief content officer Scott Gimple said he struggled to keep her in the series when there was talk of killing her. Gimple saw the potential in showing a woman who came from ill-treatment to becoming a hero of history. It's a role that meant a lot to McBride to play. ... I have always enjoyed working so closely with Norman over these many seasons, McBride said in a statement. In playing Carol, and as a viewer of the show, I also long intrigued Daryl and Carol, and what was so early between them, even then, felt somehow connected. McBride continued: Their shared history is long, and each own personal struggle to survive is even longer - a more obvious aspect of what kept them close and loyal. But there's also a rather mysterious aspect of their love for each other that I enjoy, and their playfulness when the world allows. I'm very curious! Angela has a way of shaking things up in big and unexpected ways. She's like a kid playing with Switch! I'm really excited! Gimple teases it's not goodbye, it's just time to ring the new era of 'TWD' Scott Gimple (center) on the set of TWD season seven with Angela Kang and director Michael E. Satrazemis. Gene Page/AUA It's been ten years gone before the awry that's ahead, two more ahead and stories and stories to tell about it, Gimple said, referring to TWD's pilot episode, Days Gone Bye. It's clear that this show was about a life made by a passionate cast, a team of writers/producers, producers and a film crew, bring to life the vision put forward by Robert Kirkman in his brilliant comic book - and supported by the best fans in the world, Gimple continued. We have a lot of fascinating story left to tell on TWD, and then, this ending will be the beginning of more The Walking Dead - entirely new stories and characters, familiar faces and places, new voices and new mythologies. It will be a grand final that will lead to new premiers. Evolution is eddying on us. The Walking Dead lives on. Other stars and crew share their reactions on social media.
